Introductions from everyone and how they currently wash & maintain their car.

10:15 - 11:25 am

Correct Cleaning Methods

How to clean your car – paint, windows, wheels, tyres, chrome/mouldings, wheel arches, bugs.

11:25 - 12:00 am

What is Automotive Clay & why do we use it?

What it is the purpose of using clay on paint?
Correct Clay bar application. Focusing on correct lubrication and no pressure.
How to properly check smoothness of paint, using plastic wrapping.
Removal of oxidised paint, tar, tree sap.

12:00 - 12:30 am

Lunch Break

12:30 - 12:45 pm

Technical Understanding of paint, car materials and car care product components.

What is a polish
What forms of polishes are there, i.e. compounds, Waxes, sealants, teflon, acrylic
Understanding various types of materials used in products these days
Myths about polishing

12:45 - 2:10 pm

Demonstration on a volunteered vehicle on how to apply a paint cleanser/light swirl remover/filler and sealants

Then we go to our groups and sample a variety of polishes/compounds and sealants that you desire and we divide the bonnet up into 4 sections to cross examine the results
Some vehicles may need more than a hand correction, so demonstrations of the orbital machine are conducted. Those clinic attendees that wish to use the orbital machine are given the opportunity.

2:10 - 2:20 pm

Quick Detail Spray Explained

Does it have a purpose?

Best Application method & technique.

2:20 - 2:30 pm

Mag & Wheel Protectants and Tyre Shine
